ZSUZSANNA TASI PORTFOLIO

I am a freelance graphic artist and emerging UI/UX designer with nearly two decades of experience in illustration and visual design.

My background in book, game, and NFT art has given me a strong sense of visual storytelling and composition, which I now integrate into modern interface design.

I'm currently focused on creating clean, intuitive, and visually engaging digital experiences, combining artistic creativity with user-centered design.

AURORA QUEST

<https://www.aurora.quest/>

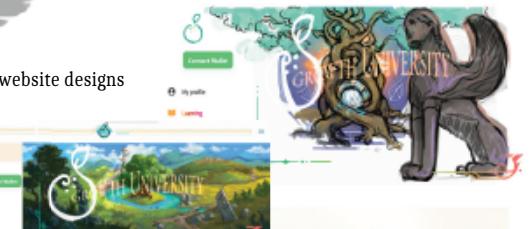

Fantasy Blockchain Education Project

Aurora.Quest is an immersive blockchain-based educational project that blends fantasy storytelling, spirituality, science, and self-development. The story follows Aurora and the Magicfox, two guides leading users through a gamified world of mystical wisdom and cosmic knowledge.

As the visual and concept designer, I created the website layout, interface elements, custom icons, background environments, and chapter illustrations. My goal was to unify the magical and educational aspects of the project through cohesive visual storytelling — merging fantasy aesthetics with clear, intuitive UI design.

AKASHA CODEX

PERSONAL PROJECT

<https://ijaszroka.wixsite.com/akashacodex>

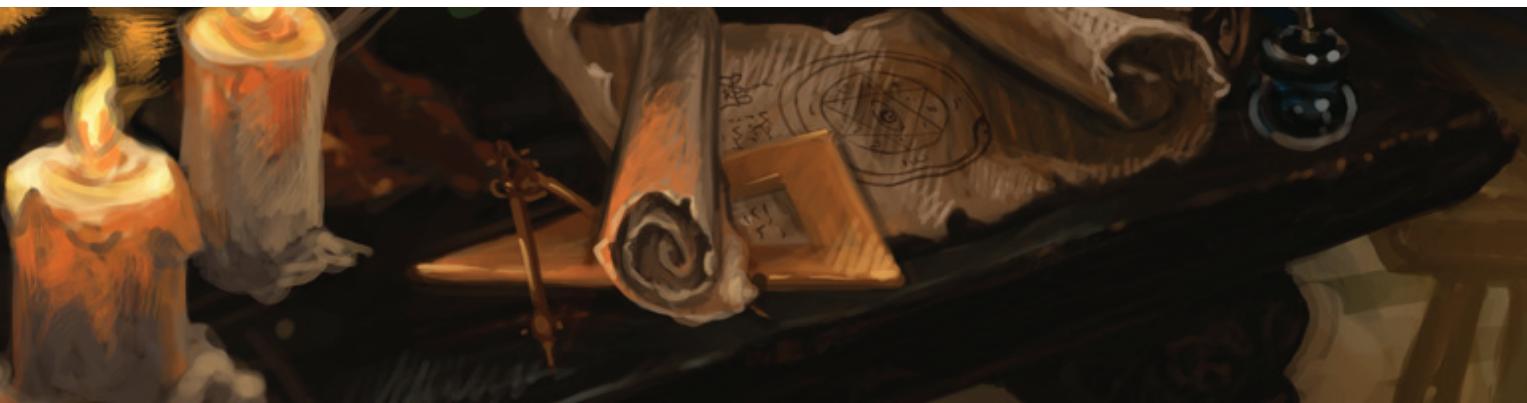

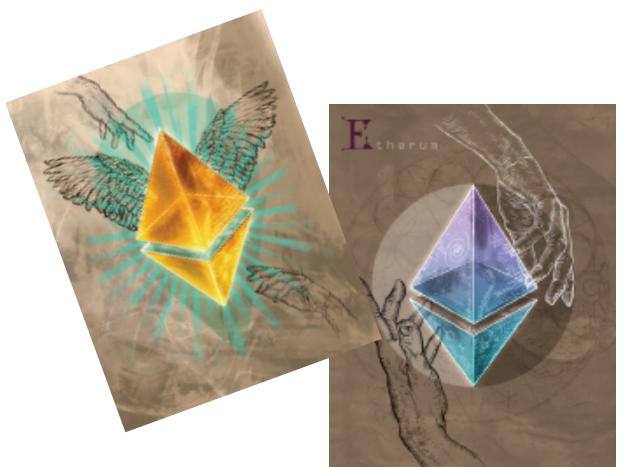

colorscheme, style design

The Akasha Codex is a visionary art and NFT project fusing alchemy, ancient wisdom, and modern science into symbolic digital artworks. It explores consciousness, energy, and the elements through Tarot-inspired illustrations and immersive visual storytelling.

As the project's creator, I design every element — from character illustrations and card compositions to UI concepts, visual storytelling, and symbolic design systems. My goal is to create a bridge between art, science, and consciousness, transforming metaphysical concepts into an aesthetic, educational, and collectible digital experience.
